# Foreword

## Wool you? Won't you?

If you're reading this catalogue foreword, you've taken your first step towards a change in the way you may possibly farm sheep in the future, it's a first step for us as well!

"New Zealand rides on the sheep's back" was the catch cry sixty years ago. On the sheep's back was wool.

I was here in this pavilion in 1964 when the world record price at auction for a Romney ram was paid, 5,600 guineas. That was around one and a half times the price of an average house back then.

Can you imagine a ram today selling for \$1.4 million?

No? But perhaps you can imagine farming low-cost sheep...no docking, no dagging, no shearing?

Wairere Nudies will take you faster to your dream of an easy care flock.

# Foreword

---

**Continuing on from a long history of innovation in sheep breeding, Wairere has taken the initiative and introduced these “Hair” sheep to the NZ market. We have branded them “Wairere Nudies”.**

For ram breeders to stay in business, they must listen to their clients and provide what the market requires. John Daniell and following on, Derek and the Wairere business have been very successful in this regard. Bringing Nudies to NZ has been a result of listening to our clients and thinking hard about the future of sheep farming.

Change is constant and inevitable, and even though the history of wool runs deep in the blood of NZ sheep farmers, history doesn't pay the bills and at this time there is a need for change. You have told us that.

Our dream is that in supporting a move by some, away from producing wool, the supply /demand equation will be brought into better balance and the value of our strong crossbred wool will lift significantly. Working on increasing demand has not been successful to date. We all have faith that this increase in value will happen.

Wairere has invested a significant sum in bringing these sheep to NZ. This does not mean that we are moving away from our Romney roots just yet. The upgrading of the Nudie flock will be aimed at incorporating all of the traits and attributes of our Romneys that serve us so well. We will continue to concentrate our time and resources on breeding Romney sheep that meet the needs of today's market.

Ideally, what will eventuate, is a national flock in which a proportion of the sheep produce no wool at all and the balance continue to grow lots of high quality wool that is sought after and highly valued.

Sheep farmers and ourselves have been searching for a practical solution to the problem of insufficient value from the wool their sheep produce. We believe we have found a practical solution that will work.

There will undoubtedly be attributes of our Nudies that will require change. We have set up this flock with as diverse a genetic base as possible and will use every tool available to us to measure, select and breed Nudies that will meet the expectations of those who may choose to farm them.

Wairere is a full service sheep genetics supplier. We have the scale, resources, expertise and the willingness to bring about a change in the NZ sheep population.

Thank you for attending the auction and supporting this change.

**SIMON BUCKLEY**

## **Welcome everyone to the first release of our Wairere Nudies.**

If you're reading this catalogue foreword, you've taken your first step towards a change in the way you may possibly farm sheep in the future, it's a first step for us as well!

I've had the privilege of being involved with the Wairere Genetics powerhouse for 20 years, initially in NZ. In 2004 I flew our first sheep to Australia, a business that is now a landholding of 1200 hectares, farming 5000 ewes (1700 recorded) and 4-500 trading cattle. I've also since 2019 been directly involved with the Wairere UK business.

All of this has given me a broad look at what's happening with sheep farming in both Hemispheres.

New Zealand, Australia & UK/Europe are all different places, however the one thing that is constant is we're all suffering the same problems: Labour (both the lack of quality people & people that want to work) and rising costs around shearing. In some places getting shearer's is a major issue. Many of us have old woolsheds that are no longer compliant for OH&S. If you're like me, past 60, going grey, and have a wife or partner who's saying we need more time away, but hang on.....you're still fit & enjoying farming. Some of the above may be raising an eyebrow (maybe it's more than 1!), then these sheep could be your answer.

The issues I've raised above haven't just been dreamt up, they're all reasons that farmers gave me when they moved to a non-shearing sheep. As one farmer told me, I farm sheep just like cattle now!

A number of NZ farmers have already started this journey. I recently flew into Auckland and drove down SH1 to Masterton, and I was amazed at how many non-shearing sheep there are already. It's not for me to judge, nor would I, the genetics currently available to NZ farmers & other genetic providers for that matter, but it's undeniable that the pool is very small. So what do these sheep offer? A completely different genetic base to anything else available in NZ, a TRUE HAIR bred sheep, and genetics that are proven and have performed under extensive high country conditions in the Scottish Borders through to intensive farming systems in the West Midlands of the UK and Northern Ireland.

Like many of you, we are interested to see how these sheep are going to perform. With what we've seen so far and the research we have put into securing these sheep, we're confident enough to release them to New Zealand farmers for this inaugural auction.

For those of you who are successful in purchasing thank you for having the confidence in both us & the sheep.

We look forward to seeing you on the 1st March.

Sincerely

**PIERRE SYBEN**

# Understanding Catalogue Information

## BREEDING VALUES (BVs) & INDEXES

Please note - The S.I.L. data that accompanies this year's rams are only expressed from limited historical information. Once more historical information is further added into the system, the figures will be more reflective of the animals genetic merit.

Breeding values (BVs) and indexes indicate the value of a ram (or ewe) as a parent. An eBV is an estimate of the breeding value of an animal as a parent for a particular characteristic or trait. This means the BV represents the worth the animal can actually pass on to its progeny. BVs are displayed in the units they are measured in, e.g. kg for weight. Generally, a more positive eBV is more favourable. They allow a comparison between rams over particular traits.

Rural Support Trust do an amazing job supporting farmers and the rural communities throughout New Zealand. Our hearts and thoughts are with the communities that have been affected by the recent adverse weather from Cyclone Gabrielle, especially the Hawkes Bay and Gisborne regions. Therefore, we would like to donate all proceeds from Kerry Hill ram 1092/22 to the Rural Support Trust to help them in their support to these communities. If anyone else wishes to donate to the Trust, please do so.

The National Council can receive donations to Rural Support Trust directly to our bank account:  
**06-0145-0743411-00**

If you wish to donate to a region please visit their regional links at:

# Wool you, won't you?

85% of Wairere Nudie embryos came from this flock of 3,000 HAIR sheep (no shedding or shearing) in the UK. This flock is farmed under NZ like conditions all year round with minimal input and high output.

## Wairere invites you to an information evening.

- A future for wool?
- Costs of wool production.
- New innovations in wool USP.
- Practical options for farmers.
- Australian and UK/EU wool production and sheep breeding.
- Wairere Nudies.
