# Wairere overview

## Wairere Allrounder

Proven, predictable, profitable

The 3 point selection difference: 1. Ewe hoggets have to get in lamb to be retained. 2. No ewes have been drenched since 2005, except two tooth occasionally. 3. All stock, including lambs, are run in large mobs at a high stocking rate. This high selection pressure under commercial conditions has made the Wairere Romney the Number One choice for New Zealand farmers for over 30 years.

Romney

## Wairere Multiplier

Low risk, high performance

The Wairere Romney with its great maternal background, combined with the Texel for carcase qualities and extra constitution, along with the Finn for superior prolificacy, is backed up by extra milk and growth from the East Friesian to complete the package.

Composite Maternal

## Wairere Challenger

Resilience plus performance

Facial eczema resilience combined with the renowned Wairere Romney for all of the benefits of hogget performance, lambing percentage, weaning weight, high growth and superior carcase, as well as great mothering ability, and tough constitution.

FE resilient. Sires tested at .55 sporidesmin.

## Wairere Tufguy

Tufguy for tough conditions

The Tufguy is a great combination of the proven Wairere Romney with all of its maternal qualities, and the carcase attributes of the Texel.

1/2 Romney, 1/2 Texel

## Wairere Dominator

Meating the market

The Wairere Dominator has been developed since 2003 by combining the best of New Zealand's terminal breeds to create a composite terminal that is today truly meating the market. Important attributes required by our clients are high survival of lambs at birth, strong constitution, good longevity, sound feet and a black face for easy identification.

Composite terminal

## Wairere Merino SmartSheep

For high priced meat and wool

Wairere Merino fills a niche in the drier country of the South Island. The stabilised breed mix brings the robust constitution, good feet, high lambing percentage and high growth rate of the Romney. The Merino allows ewe hoggets to average 22 to 23 micron, and the ewes 25 to 26 micron.

Romney/Merino Halfbred

## Seven great reasons for buying Wairere rams:

1. Wairere rams are proven winners. Proven, predictable, profitable. Over five hundred farmers use Wairere rams and enjoy the benefits.
2. Wairere rams bounce back after a hard time. Wairere is a harsh testing ground. A high stocking rate on second class hill country does the culling .... "let the fittest survive."
3. Wairere rams add value to your stock. New Zealand's best known brand often creates a premium for sale stock: store lambs, ewe lambs, two tooth ewes, five year ewes. If you sell your farm, or give up a lease, you can be confident that your capital stock will be keenly sought after.
4. Wairere rams are backed by scale. Twenty thousand Wairere ewes produce Romney, Composite and Dominator rams for sale. Big numbers allow heavy selection pressure.
5. Wairere rams have been around a long time. Wairere has been the number one brand by sales over the past thirty years. The foundation was set in 1929, when Len Daniell started a registered Romney stud.
6. Wairere rams have sexy sisters. Ewe hoggets must get in lamb to be retained.
7. Wairere rams reduce your workload. All ewe hoggets have been mated since 1966, and lambed unshepherded. We cull heavily on dags, feet, and other basics. Easycare is key to happy sheep farming.
